DEBRIEF

Learning Objectives:

Observations:

What I see:	What I think about it:

Examples of Key Questions:

GATHER:
How was that? How did that feel?
Talk me through the scenario?
What happened during the scenario?
What did you do?

ANALYZE:
What do you think went well?
Why was that?
What would you like to improve?
What made things more challenging?
How can you relate this to clinical practice?

SUMMARIZE:
What have you learned from this?
What can you take from this that is relevant to your clinical practice?
How will you apply this to your clinical practice?
I would like each of you to tell me one thing that you have learned and can apply to your clinical practice.

List of Learner Identified Learning Outcomes:

Note: Simulation Lead to take notes on what learners identified as key learning. Keep this as part of evaluation data.
